

## Table of Tables

### Panhandle Water Plan

---

Chapter No.		Page No.
<b>Chapter 1</b>	<b>Planning Area Description</b>	
1-1	Voting Members of the Panhandle Water Planning Group	1-6
1-2	Cities and unincorporated Areas in PWPA	1-8
1-3	Economic Activities of Counties in the PWPA	1-12
1-4	Summary of Policies Affecting Water Quality and Quantity in Texas	1-15
1-5	Groundwater Conservation Districts in PWPA	1-16
1-6	Estimated Groundwater Storage Volume (million ac-ft) of the Ogallala Aquifer in the PWPA	1-21
1-7	Dockum Aquifer Storage and Recharge	1-23
1-8	Individual Water Rights in the PWPA: Permitted and Actual Use (Greater Than or Equal to 1,000 ac-ft)	1-25
1-9	2008 303(d) Listed Segments in the PWPA	1-27
1-10	Historical and Projected Municipal Water Use for the PWPA	1-30
1-11	Water Used by CRMWA Member Cities in the PWPA during 2006	1-30
1-12	TWDB Historical and Projected Industrial Water use for the PWPA	1-32
1-13	Number of Farms and Acres of Harvested Cropland	1-33
1-14	Historical and Projected Irrigation Water use for the PWPA	1-34
1-15	Estimates of Livestock Water Use in the PWPA during 2006	1-36
1-16	Projections for Livestock Water Use in the PWPA	1-37
1-17	Mined Products for Counties in the PWPA	1-41
1-18	Physical characteristics of playas within the PWPA	1-46
1-19	Threatened and Endangered Species in the PWPA	1-48
1-20	Service Connection per Mile of Main Line	1-51
1-21	Drought Triggers Station Locations and Response Zones	1-53
<b>Chapter 2</b>	<b>Population and Water Demand Projections</b>	
2-1	PWPA Population by County 2000-2060	2-3
2-2	Historical Sales for Wholesale Water Providers	2-19
2-3	Projected Water Demand for the City of Amarillo	2-19
2-4	Projected Water Demands for Greenbelt M&IWA	2-20
2-5	Projected Water Demands for CRMWA	2-21
2-6	Projected Water Demands for the City of Borger	2-21
2-7	Projected Water Demands for the City of Cactus	2-22
<b>Chapter 3</b>	<b>Water Supply Analysis</b>	
3-1	Total Water in Storage in the Ogallala/Rita Blanca Aquifer	3-6
3-2	Available Water Supply from the Ogallala	3-7
3-3	Total Water in Storage in the Seymour Aquifer (GAM 2005 Results)	3-9
3-4	Available Annual Water Supply from the Seymour Aquifer	3-9
3-5	Total Water in Storage in the Blaine Aquifer (GAM 2005 Results)	3-10

3-6	Available Annual Water Supply from the Blaine Aquifer (1.25% Available Supplies in ac-ft)	3-10
3-7	Total Water in Storage in the Dockum Aquifer	3-11
3-8	Available Annual Water Supply from the Dockum Aquifer (1.25% Available Supplies in ac-ft)	3-11
3-9	Descriptive Information of Water Supply Reservoirs in the PWPA	3-18
3-10	Projected Yield and Available Supply of Lake Meredith	3-19
3-11	Projected Yield of Palo Duro Reservoir	3-20
3-12	Projected Yield and Available Supply of Greenbelt Reservoir	3-21
3-13	Total Run of the River Water Rights by County in the PWPA	3-24
3-14	Descriptive Information of Minor Reservoirs in the PWPA	3-25
3-15	Acreage and Estimated Maximum Storage of Playa Lakes in the PWPA	3-28
3-16	Direct Reuse in the PWPA	3-29
3-17	Summary of Local Supplies in the PWPA	3-30
3-18	Summary of Available Water Supplies in the PWPA (Firm Yield)	3-31
3-19	Projected Demand on the Ogallala Aquifer in PWPA	3-35
3-20	Summary of Exports and Imports with other Regions	3-36
3-21	Summary of Groundwater Exports and Imports within the PWPA	3-37
3-22	Developed Water Supplies to Water User Groups in PWPA	3-38
3-23	Unallocated Water Supplies in PWPA	3-38
3-24	Comparison of Supply and Demand by County	3-42
3-25	Year 2010 Shortages by County and Category	3-43
3-26	Year 2030 Shortages by County and Category	3-44
3-27	Year 2060 Shortages by County and Category	3-45
3-28	Decade Shortage Begins by County and Category	3-46
3-29	Projected Irrigation Shortage in the PWPA	3-47
3-30	Projected Municipal Shortages in the PWPA	3-47
3-31	Projected Manufacturing Shortages in the PWPA	3-48

#### **Chapter 4 Identification, Evaluation, and Selection of Water management Strategies Based on Needs**

4-1	Identified Shortages in the PWPA	4-3
4-2	Summary of Strategy Impacts and Cost Evaluation	4-6
4-3	Assumptions Made for Additional Groundwater Wells	4-8
4-4	Irrigation Shortages Identified in the PWPA	4-42
4-5	List of Potentially Feasibly Irrigation Strategies	4-43
4-6	Possible Water Management Strategies for Reducing Irrigation Demands	4-45
4-7	Estimated Total Water Savings and Costs Associated with Proposed Water Conservation Strategies in PWPA	4-47
4-8	Dallam County Projected Annual Irrigation Shortage and Water Savings by Strategy 2010-2060	4-48

4-9	Hansford County Projected Annual Irrigation Shortage and Water Savings by Strategy 2010-2060	4-49
4-10	Hartley County Projected Annual Irrigation Shortage and Water Savings by Strategy 2010-2060	4-50
4-11	Hutchinson County Projected Annual Irrigation Shortage and Water Savings by Strategy 2010-2060	4-51
4-12	Moore County Projected Annual Irrigation Shortage and Water Savings by Strategy 2010-2060	4-51
4-13	Sherman County Projected Annual Irrigation Shortage and Water Savings by Strategy 2010-2060	4-52
4-14	Estimated Costs of Irrigation Wells in PWPA	4-54
4-15	Summary of Demands, Supplies, and Recommended Strategies for CRMWA	4-55
4-16	Summary of Demands, Supplies, and Recommended Strategies for Amarillo	4-58
4-17	Summary of Demands and Supplies for the City of Borger	4-60
4-18	Summary of Demands, Supplies, and Recommended Strategies for the City of Cactus	4-62
4-19	Summary of Demands and Supplies for the Greenbelt M&IWA	4-65
4-20	Distribution of Water from Palo Duro Reservoir	4-67
4-21	Summary of Water Savings from the Recommended Conservation Water Management Strategies	4-72
<b>Chapter 5</b>	<b>Impacts of Selected Water management Strategies on Key Parameters of Water Quality and Impacts of Moving Water from Rural and Agricultural Areas</b>	
5-1	Selected Public Drinking Water Supply Parameters	5-2
5-2	2008 303d Listed Segments in the PWPA	5-4
5-3	Surface Water Segments in the PWPA and Associated Water Quality Issues	5-5
5-4	List of public water supply well fields occurring in areas of concern for dissolved chloride and nitrate in groundwater	5-10
5-5	Areas of Groundwater Contamination in the PWPA	5-14
<b>Chapter 6</b>	<b>Water Conservation and Drought Management Recommendations</b>	
6-1	Municipal Water Users Gallons Per Capita Per Day	6-4
6-2	County-Other Water Users Gallons per Capita per Day	6-5
6-3	Potential Agricultural Conservation Savings	6-6
6-4	Water Users in the PWPA that area Required to Prepare Water Conservation Plans	6-8
6-5	Type of Trigger Condition for Entities with Drought Contingency Plans in PWPA	6-23
6-6	Reservoirs in the Panhandle Region Planning Area	6-24

**Chapter 7 Description of How the Regional Water Plan is Consistent With Long-term Protection of the State’s Water Resources, Agricultural Resources, and Natural Resources**

7-1 Plan Consistency

7-6

**Chapter 9 Report to Legislature on Water Infrastructure Funding Recommendations**

**Chapter 10 Plan Adoption and Public Participation**
